

CAPTIVE CARRIER TRANSTRAX™

Captive Carrier was purpose-built for pharmacy drive-thru, but its reliability and carrier size have made it an ideal solution in applications across a variety of industries.

When deployed as a second-lane drive-thru solution, Captive Carrier keeps business moving safely and reliably. Staff can send the carrier out at truck or car heights, where enhanced audio allows customers and staff to communicate with clarity. The carrier doors open automatically upon arrival, allowing the customer to insert payment or retrieve their order. Unlike pneumatic or air tube systems, the carrier itself remains fixed to the track system, so it won't be lost or damaged in a typical transaction.

FEATURES

- Superior capacity compared to pneumatic carriers
- Light footprint allows you to maximize utilization of real estate
- Supports credit/debit/signature/transaction processing
- Delivery to car or truck height
- Superior motor life and reliability vs. pneumatic tube systems

AVAILABLE OPTIONS

- Multiple audio/video options, including BEAM compatibility
- Privacy handsets
- Reverse lane delivery
- Debit/credit card readers
