Installation Instructions

E. F. Bavis & Associates, Inc.

201 Grandin Road
Maineville, Ohio 45039
(513) 677-0500

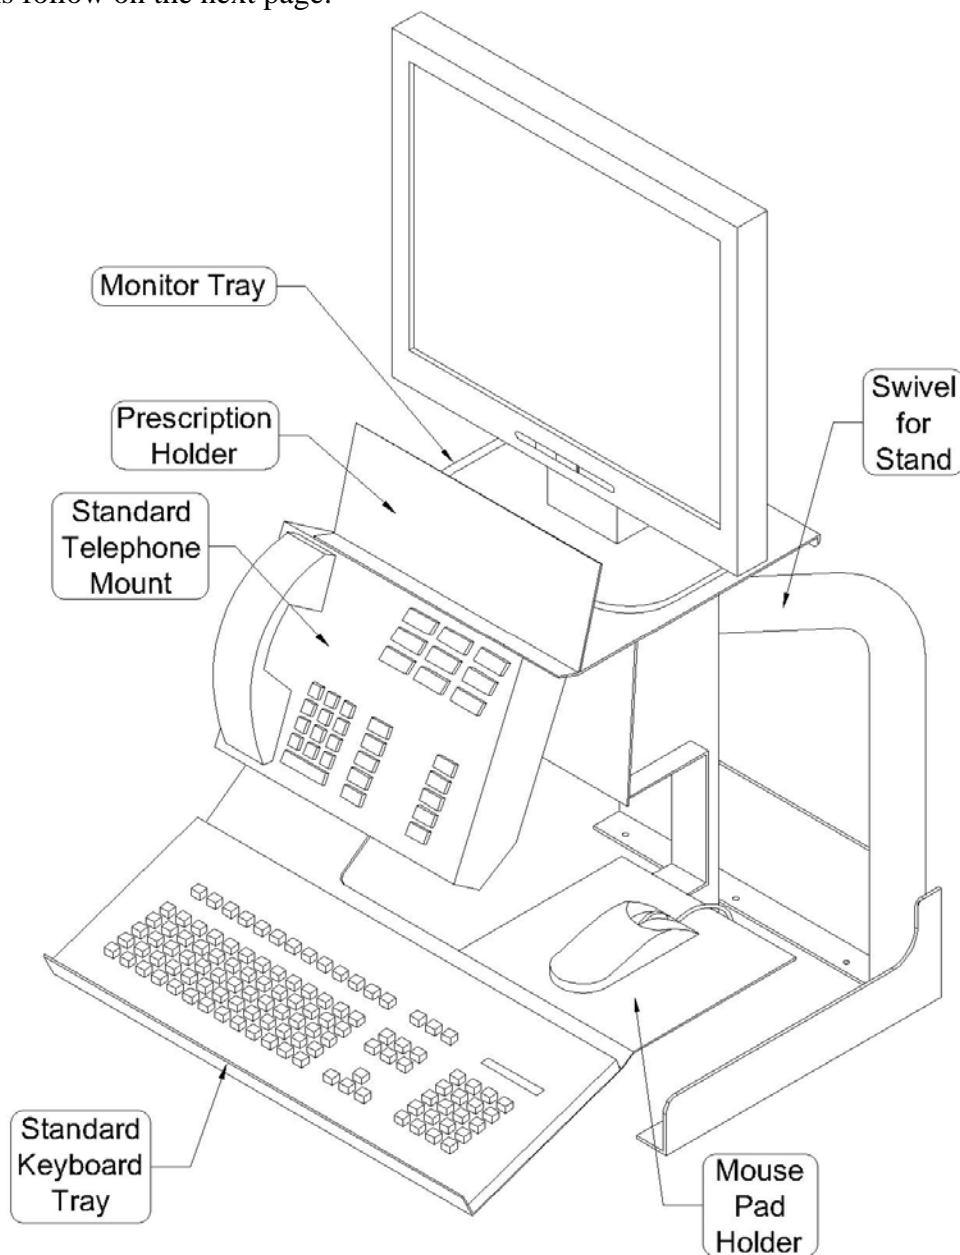

Notice:

The monitor stand is designed to be used with LCD monitors. It is not designed to handle standard CRT type monitors. Please read any and all warning labels affixed to the machine.

Installation:

This device is designed to be mounted to a one inch or thicker counter system. Enclosed in this package are screws, decorative caps and even the drill bit to make the holes for the screws. Please note that all six screws must be installed in the base in order for the stand to have the strength required for operation. Three wire ties are included to aid in wire routing and placement. Equipment is to be installed on stand as shown in the illustration below.

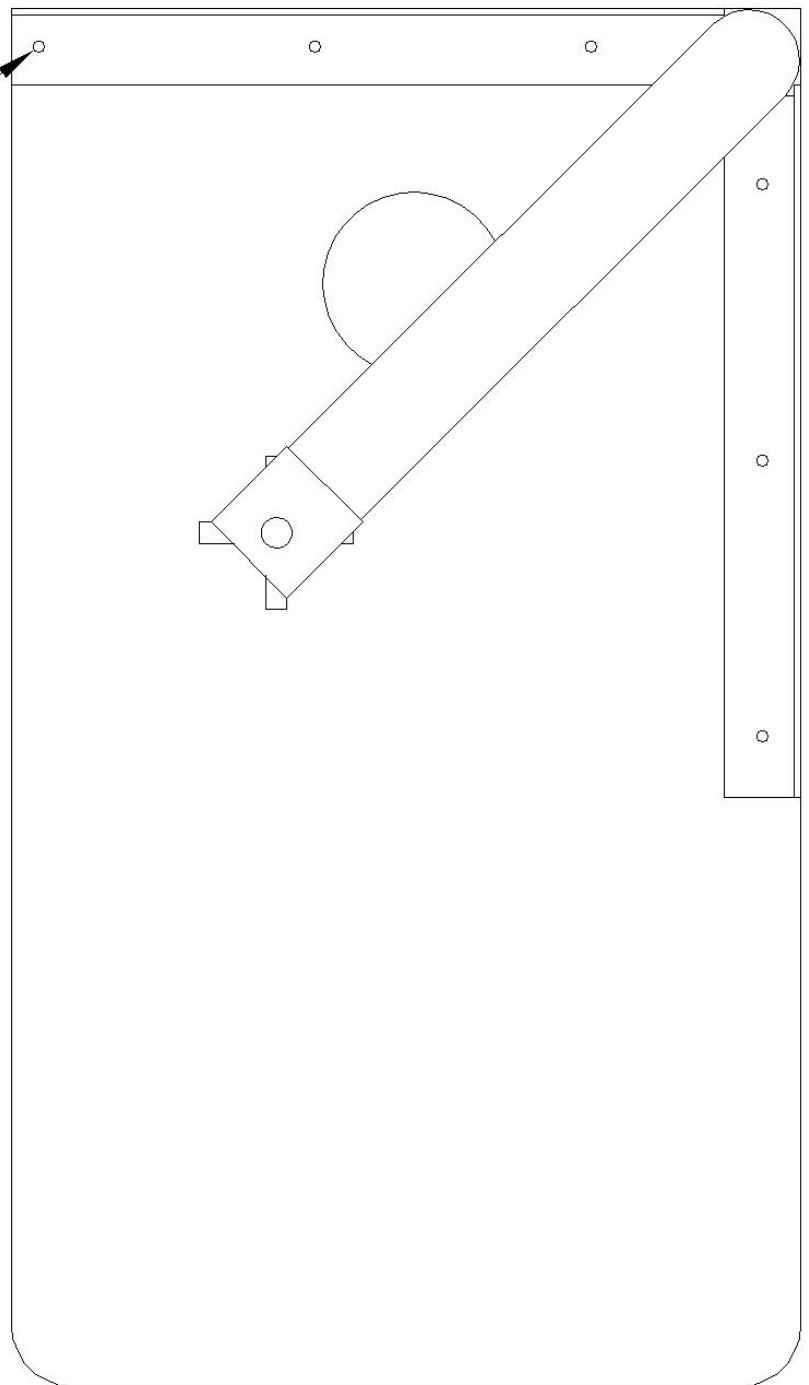

The only tools that are required to install this stand are a #2 Philips head screw driver and a drill. Instructions follow on the next page.
